Summary

Creative and performance-driven front-end developer with a passion for crafting elegant, responsive web experiences. I specialize in clean architecture, minimalist design, and high-fidelity animations using Nuxt.js, TailwindCSS, GSAP, and Strapi. From corporate websites to scalable e-commerce platforms, I deliver pixel-perfect interfaces backed by modular, secure code. I lead with precision, collaborate with design teams, and thrive where UX meets engineering.

Experience

Senior Front-End Developer | 07/2025 - Present | Arvand Academy | Isfahan

A fully optimized, production-grade corporate website built for Arvand, featuring a sleek, responsive UI and dynamic interactions. Developed with **Nuxt.js** for server-side rendering and modular architecture, **TailwindCSS** for utility-first styling and rapid layout iteration, and **GSAP** for smooth, high-performance animations.

Senior Full-Stack Developer | 03/2025 - Present | Niyayesh Org | Isfahan

A fully customized e-commerce platform engineered for performance, scalability, and pixel-perfect design. Developed using **Nuxt.js** for SSR and modular architecture, **TailwindCSS** for rapid UI development, **GSAP** for fluid animations, and **Strapi** as a secure, headless CMS.

Junior Web Developer | 06/2020 - 07/2025 | YarNovin | Remote

Partners with developers to craft intuitive, elegant interfaces and solve real-world UX challenges. Builds vibrant online communities by guiding conversations, spotlighting valuable contributions, and maintaining a welcoming space for innovation.
